RE: Evening Ambient Air Monitoring Activity – 1/15/2026
City of Galena Construction and Demolition Landfill
KDHE Permit No. 738
Galena, Cherokee County, Kansas

Dear Mr. Reed,

Ambient air monitoring was conducted on the evening of January 15, 2026, for hydrogen sulfide (H₂S) around the Jordan Disposal Landfill. Per manufacturer recommendations, the Jerome J605 unit was regenerated and fresh air “zeroed” using the appropriate zero air filter prior to sampling the ambient air for H₂S concentrations at seven (7) predetermined locations. Basic weather information was collected at each location at the time of sampling from the Apple Weather Application and documented along with the H₂S reading from the J605 unit. The sampling locations are exhibited in Figure 1 attached to this summary letter, and the collected data is presented in Table 1 below.

Table 1: Ambient Air Monitoring for Hydrogen Sulfide

Testing Address	Date	Time	H ₂ S Reading (PPB)*	Wind Direction	Wind Speed (MPH)	Temp (°F)
1 st & Galena Ave	1/15/26	2119	0.00	SSW	12	37
Front St – E. of Bridge	1/15/26	2123	7.49	SSW	12	37
Front & Bellevue St	1/15/26	2126	0.00	SSW	12	37
Landfill Gate	1/15/26	2128	0.00	SSW	12	37
1401 K 66	1/15/26	2135	0.00	SSW	12	37
3 rd & Bellevue St	1/15/26	2140	0.00	SSW	12	38
4 th & Lincoln Ave	1/15/26	2145	0.00	SSW	12	38

* Readings less than 3 PPB are below the J605 instrument detection range and cannot be accurately verified.

The monitoring was conducted by Shane McKinzie, and KDHE’s Heather Merrit and two staff members accompanied me to observe air monitoring process. As always, the opportunity to provide this service is very much appreciated. If you have questions, comments, or need additional information, please do not hesitate to reach out.

Sincerely,

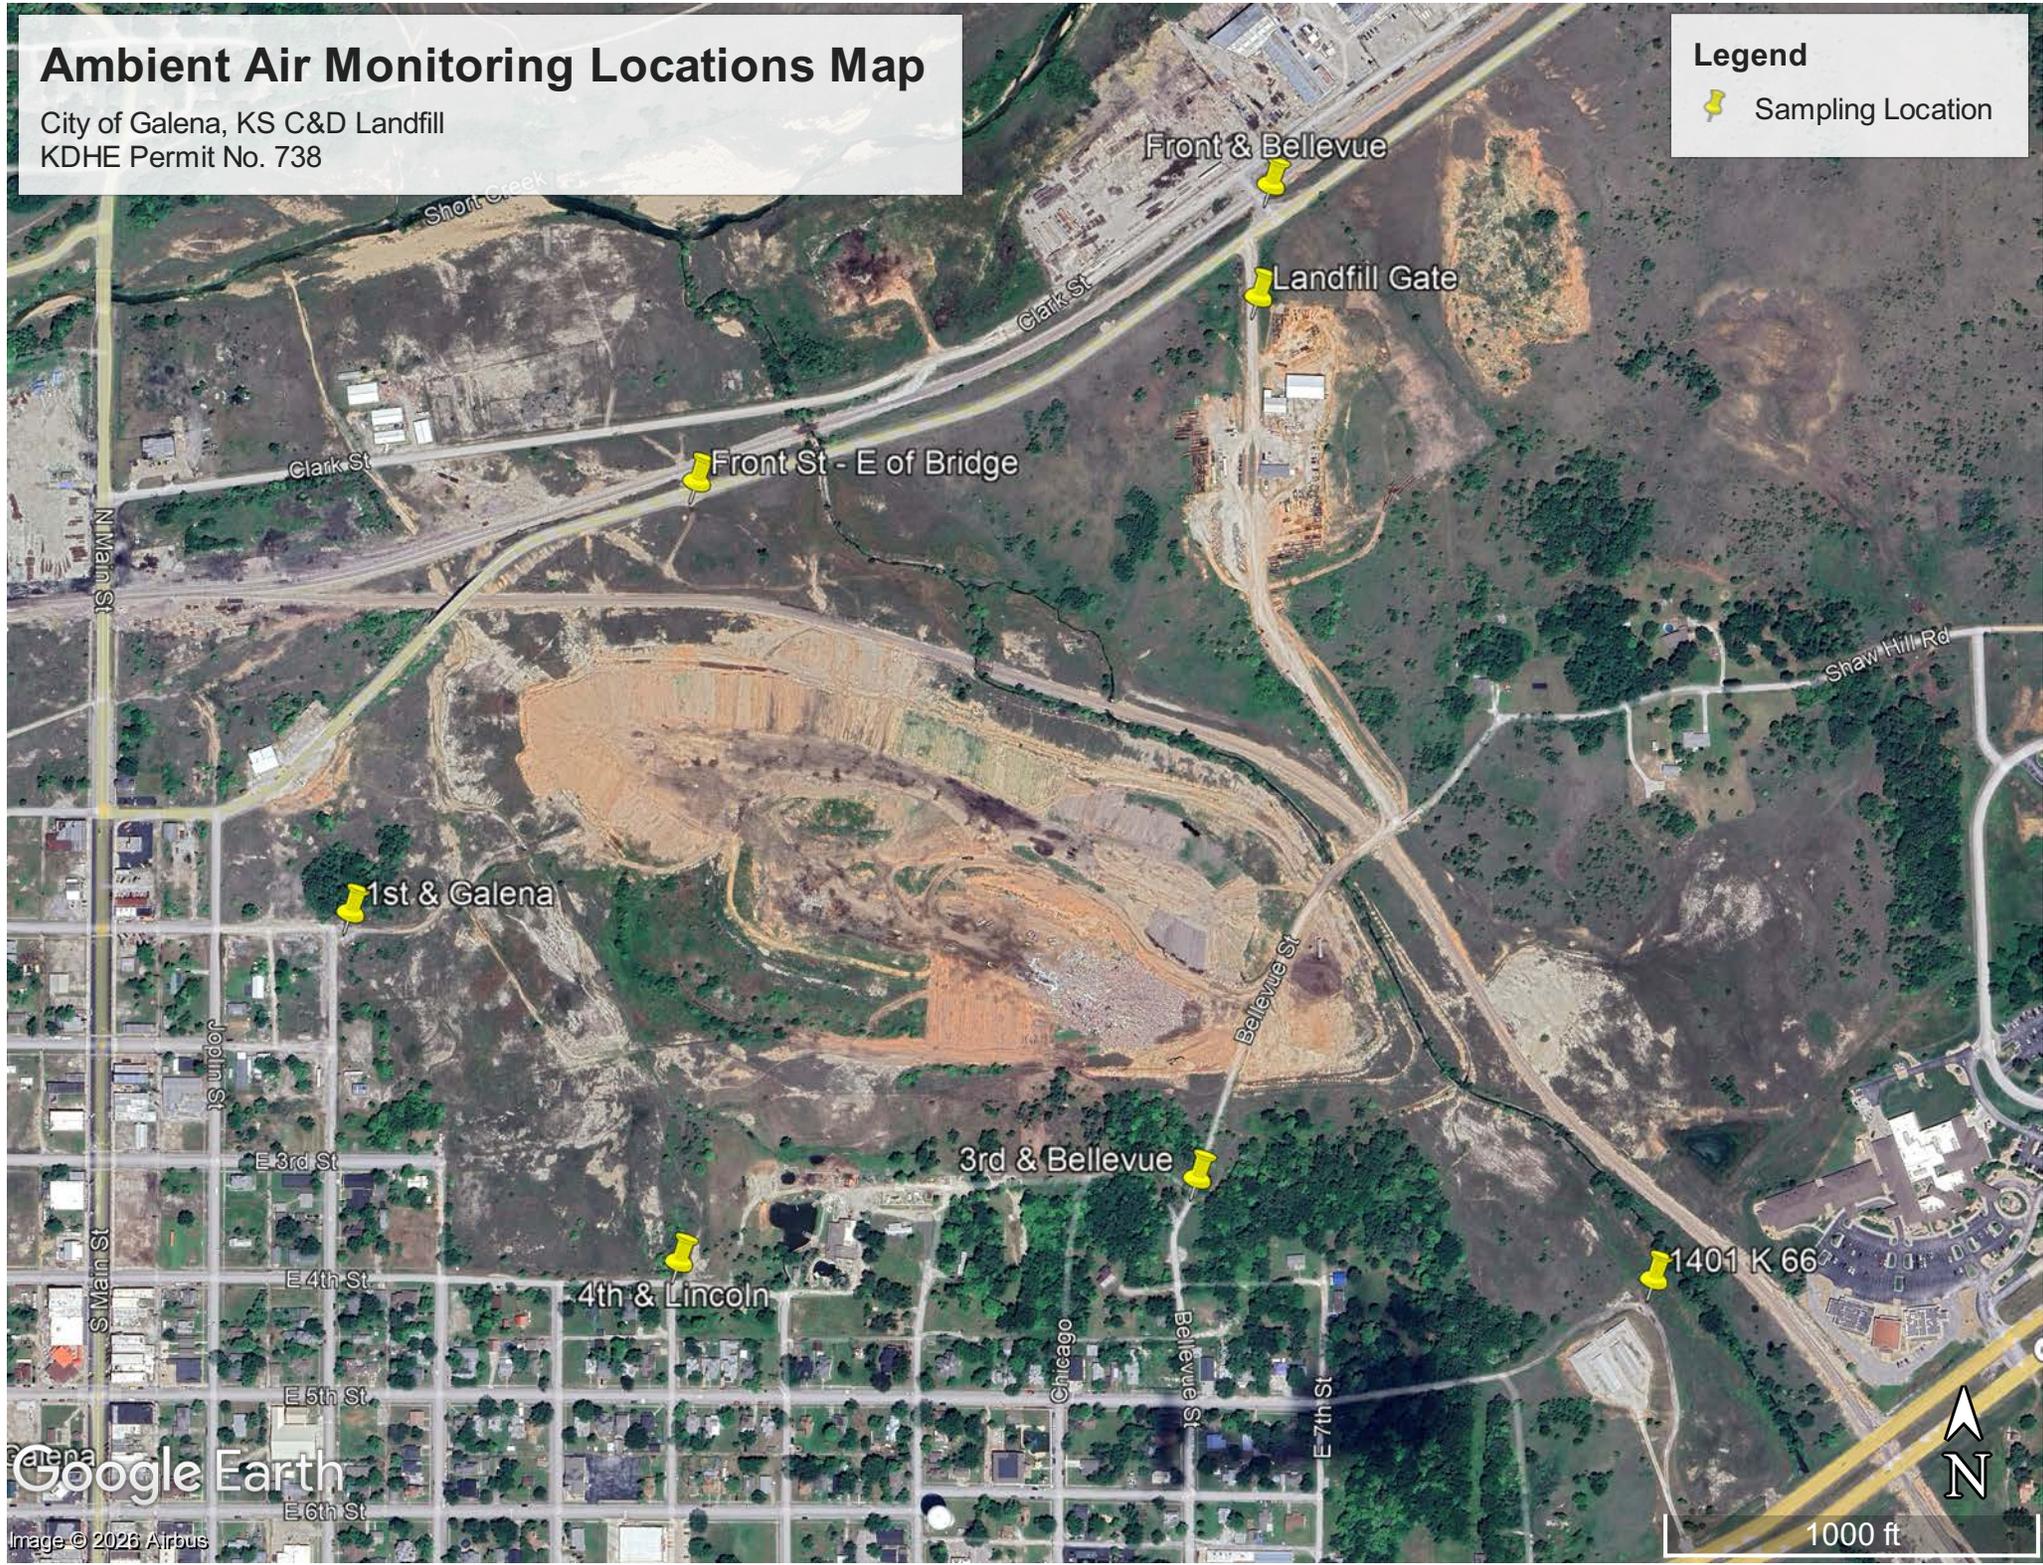

Shane McKinzie
