Re: Request to use shingles mixed with soil for intermediate cover at the City of Galena construction and demolition landfill, Permit 738, CK Co.

Dear Mr. Klumper and Ms. Charles:

I am writing to approve your e-mail request to use a 50:50 mixture of ground shingles and soil for intermediate (2,000 tons of waste received or 120-day) cover at the City of Galena construction and demolition (C&D) landfill. The request is approved with the following conditions:

1. The soils and shingles are mixed prior to application.
2. If the shingles or soil-shingle mixture is stockpiled prior to use, it must be stored in an area with run-off controls.
3. Consistent with the standard cover requirements in Kansas Administrative Regulation (K.A.R.) 28-29-308(k), one foot of this cover material, soils, or a mixture of this cover material and other approved cover materials material will be applied every 120 days, or 2,000 tons of waste received, whichever occurs first, with cover application not required more frequently than weekly.
4. Landfill employees must record the alternative cover use dates in the facility's operating log.

Permission to use alternative cover may be rescinded or amended if the requirements in K.A.R. 28-29-308(k)(2) to limit air intrusion, control litter, and limit vector harborage are not met, or if rescinding this authorization is necessary to prevent nuisance conditions or adverse impacts to human health and/or the environment.

This approval is considered a minor modification pursuant to General Condition 4(b) in Permit 738. Please amend the operations plan for this facility consistent with your request and this approval. One way to accomplish this would be to insert copies of this approval letter into the approved operations plan. By copy of this letter, the amendment is being forwarded to KDHE's District Office for their file as well.

This authorization to use ADC does not release the permittee from conformance with other requirements set forth in the state solid waste regulations and permit conditions.

The Bureau of Waste Management is attempting to go as paperless as practically possible. Therefore, this approval is only being transmitted by e-mail.

Greg, Klumper, General Manager
